Afternoon course selection must be made by health care discipline; please select the appropriate track.

This full day education program offers up to 7 continuing education hours as required by many national, state, and local licensing boards and professional organizations. Application is being made to the BRPT for CTSEs for Sleep Technologists and to the AARC for CRCEs for Respiratory Therapists. The Board of Registered Polysomnographic Technologists (BRPT) designates this educational activity for a maximum of 7 Continuing Sleep Technology Education credits. Individuals should claim only those credits that he/she actually earned in the educational activity. Save your course outline and certificate of completion, and contact your own credentialing board or licensing organization for specific filing requirements other than those listed above.
