This full day education program offers up to 7 continuing education hours as required by many national, state, and local licensing boards and professional organizations. Applications are being made to the BRPT for CTSEs for the Sleep Track, and the AARC for CRCEs for the Sleep and Respiratory Tracks. The Board of Registered Polysomnographic Technologists (BRPT) designates this educational activity for a maximum of 7 Continuing Sleep Technology Education credits.

For information about the approval status of contact hours for the Sleep Track & Respiratory Track, contact Brock Richmond at (440) 232-3000. Individuals should claim only those credits that he/she actually earned in the educational activity.

Credits may also be recognized by other accrediting bodies.

It is recommended that you to confirm with your local licensing body to ensure reciprocity. Medical Service Company is not responsible for credits being accepted for licenses other than what is disclosed. Please save your course outline and certificate of completion, then contact your own credentialing board or licensing organization for specific filing requirements other than those listed above.

If you need assistance or have questions, please email us at JSMCEU@medicals-serviceco.com.
